Portfolio: raphaelmoreira.netlify.app

EDUCATION

New Jersey Institute of Technology | Newark, NJ | Sep. 2020 - Dec. 2024

Bachelor of Engineering Technology in Computer Technology | GPA: 3.75 | Dean's List

EXPERIENCE

Bergen Logistics | WMS Support Specialist | North Bergen, NJ | May 2024 - Present

- Designed and delivered custom SQL-based reports tailored to client and executive requirements for inventory management and operational performance.
- Automated routine and ad-hoc reports using Python, improving accuracy and reducing turnaround time for data delivery.
- Collaborated with teams to develop reports that support troubleshooting and decision-making for warehouse operations.
- Provided technical support for the Warehouse Management System (WMS) to ensure seamless functionality and operational continuity.

PROJECTS

Chirp | React, Node.js, Express, PostgreSQL, Prisma

- Built a full-stack Twitter/X clone with JWT authentication, posts, likes, comments, follow system, and user profiles.
- Implemented a RESTful API with Passport.js for authentication and Prisma ORM for complex relational data queries.
- Deployed frontend on Netlify, backend on Render, and database on Neon (PostgreSQL).

Messaging App | React, Node.js, Express, PostgreSQL, Prisma

- Developed a full-stack Discord-inspired messaging app with direct and group conversations, friend requests, and user profiles.
- Built a secure REST API with JWT authentication, bcrypt password hashing, and role-based access control.
- Designed a responsive UI with React Router for seamless navigation between conversations and friend management.

Find It | React, Node.js, Express, PostgreSQL, Prisma

- Created a Where's Waldo inspired photo tagging game with real-time character detection and a global leaderboard.
- Implemented coordinate-based click validation on the backend to prevent client-side cheating.

TECHNICAL SKILLS

- Languages: JavaScript, Python, HTML, CSS, SQL
- Frontend: React, React Router, Vite, Responsive Design
- Backend: Node.js, Express, Passport.js, REST APIs
- Databases: PostgreSQL, Prisma ORM, MySQL, MongoDB
- Tools: Git, Docker, Cloudinary, Netlify, Render, Neon
