SUMMARY

Full-stack developer with professional experience in SQL reporting and Python automation, seeking a junior developer role. Experienced building and deploying applications with React, Node.js, and PostgreSQL.

EDUCATION

New Jersey Institute of Technology | Newark, NJ

Sep. 2020 – Dec. 2024

Bachelor of Engineering Technology in Computer Technology | GPA: 3.75 | Dean's List

EXPERIENCE

Bergen Logistics | WMS Support Specialist | North Bergen, NJ

May 2024 – Mar. 2026

- Designed custom SQL reports for inventory management and operational performance, used by executive teams for decision-making.
- Automated recurring and ad-hoc reporting workflows with Python, eliminating manual data entry and reducing turnaround time across multiple client accounts.
- Supported the Warehouse Management System, troubleshooting configuration and performance issues to maintain warehouse operations.

PROJECTS

Chirp | *React, Node.js, Express, PostgreSQL, Prisma* | [Live Demo](#) | [GitHub](#)

- Built a full-stack Twitter/X clone with JWT authentication, posts, likes, comments, following, and user profiles.
- Designed a self-referential Follow model in PostgreSQL, enabling efficient feed queries without N+1 database calls.
- Deployed frontend on Netlify, backend on Render, and database on Neon.

Messaging App | *React, Node.js, Express, PostgreSQL, Prisma* | [Live Demo](#) | [GitHub](#)

- Developed a full-stack Discord-inspired messaging app with direct/group conversations, friend requests, and user profiles.
- Architected a many-to-many conversation model with deduplication logic to prevent duplicate DMs.
- Implemented JWT authentication with bcrypt and Passport.js middleware for protected routes.

Find It | *React, Node.js, Express, PostgreSQL, Prisma* | [Live Demo](#) | [GitHub](#)

- Created a Where's Waldo-inspired photo tagging game with character detection and a global leaderboard.
- Implemented backend coordinate validation to prevent client-side cheating without exposing character coordinates.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React, React Router, Vite, Responsive Design

Backend: Node.js, Express, Passport.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB | ORM: Prisma

Tools: Git, Docker, Cloudinary, Netlify, Render, Neon
